

November 30, 2006

Atlantic Division Naval Facilities Engineering Command  
Attn: Code EV21 (Atlantic Fleet Sonar PM)  
6506 Hampton Blvd.  
Norfolk, Va. 23508-1278

To Whom It May Concern:

I am writing to express my opposition to proposed active sonar use off of the North Carolina coast. Divers and sport fishing enthusiasts come from all over the USA and from other countries to dive and fish off of the North Carolina coast. The reason they come here is because this area is biologically unique and rich with marine life, including endangered species. Active sonar could cause extinction of marine species (such as the right whale, sea turtles, white marlin, blue marlin and bluefin tuna, etc.). It could damage critical habitats and could seriously injure divers. The loss of this biologically rich area because of active sonar blasting would be a loss not only to North Carolina but to our nation as well.

Sincerely,

Susan Davis
