① Reach out to the media as much as possible
Locally the Virginian Pilot has written several rather negative articles about the US Navy and sonar. Maybe if the media hears what's really going on, and understands why our country needs Navy sonar, the coverage will be more balanced. There are very quiet submarines in the hands of unfriendly nations, and the Navy absolutely needs training in finding and tracking submarines. Best of luck!

② And are other nations wary of sonar's effect on whales? I tend to doubt it.
