11/9/2006 10:42	King	Drew					Florida		Thank you for holding the recent scoping meeting in Jacksonville, FL. I kept hearing the phrase "emerging science" relative to concerns about impact of active sonar on marine life, but I did not hear how or that you were integrating factors related to climate change in the analysis, especially as they might be impacting marine animal behavior patterns. Please consider this "emerging science" as well.
