My comment addresses not the benefits ^{to the Navy} or environmental aspects of associated with it. The process is flawed in that the Navy (or persons working for the navy) justify their needs and are heavily involved in the decision making process. The Navy is by nature heavily biased in support of this project and expends great amounts of taxpayer dollars to justify their position. I recommend an independent team of individuals be assigned to review in detail (much as a jury trial) and make recommendations on the outcome. This will take the (as much as possible) the bias out of the decision making process and the citizen will have much more trust in the outcome.
