3/13/2008 18:52	Please do not hold your sonar exercises off the South Carolina coast! I am earnestly concerned about the potentially disastrous and lethal consequences of high-powered sonar blasts of the marine life throughout the area. It has already been proven repeatedly in other locations that these exercises destroy whales, driving various species to the very brink of extinction. Please coordinate your planning for such training with leading environmental groups so as to identify areas where the impact on marine life will not be so damaging!	Weldon P.	Barker	[REDACTED]	Summerville	South Carolina	[REDACTED]
